3. Entry fee is 10% of first premiums for all entries. Wherever a \$10 6-Day Exhibitor Pass is specified, it shall also be understood to read a \$5 6-Day Youth Exhibitor Pass if the exhibitor is 17 years or under.
4. In order to qualify for the purchase of a \$10 6-day exhibitor pass, exhibitors must make a minimum of 3 entries in Department 13. Each exhibitor is allowed only one exhibitor pass – cannot not be combined with other department entries.
5. No passes will be mailed. All passes will be distributed by the Department Superintendents upon delivery of items for judging.
6. Submission of an entry implies the exhibitor has read and agrees to the Fair's General Rules and Regulations and the Department's Rules and Regulations.

20. **PLEASE NOTE: Due to the extended length of the Fair, fruits and vegetables may become deteriorated. These will be removed at the sole discretion of the Superintendent and/or Director in Charge. Exhibitors may replace deteriorated items (although it is not necessary). Exhibitors will be responsible for any admission fees to the fairgrounds when replacing items.**

Standard of Excellence

- a. **Freedom from blemish:** This is the first and foremost qualification for good fruit. Show fruit should be absolutely free from marks of fungi or physiological trouble including stripping and water core, insect injuries of all kinds, and mechanical injury such as loss of stem, burn, russet, or limb rub.
- b. **Color:** All specimens in any entry should be of a uniform* color and the color should be typical for the variety in the district grown. In a yellow or green apple the yellow or green color should be clear and even all over. In varieties that are typically blushed, the specimens should show a distinct tinge of red on the cheek that was exposed to the sun. With apples like Greening the presence or absence of blush should not detract except that apples on any one plate should be uniform. In general with red varieties the more color the better, provided the color is typical. Apples may be polished, but in no case will polished specimens be given the preference.
- c. **Size:** The specimens in any one display or exhibit should be uniform* in size and of the size that is most acceptable on the market for the variety. An exhibit may be cut for being either under or over the accepted commercial size.
- d. **Form:** The shape and conformation of the apple in any one display or exhibit should be typical for the variety. All specimens should be uniform* in shape. When competition is close, a careful comparison of the more minute characteristics of the basin, cavity, and stem are made when considering uniformity of form.
- e. **Condition:** This refers to the degree of ripeness. An apple to be in perfect condition should be mature, and firm for the variety. It should be free from withering that comes when apples are picked too green or have not been stored properly. The fruit should not be over-ripe so as to be mealy or show physiological breakdown.

*Attention is called to the fact that in the standard outlined above uniformity is not listed as a separate item, but is considered under each of the headings, color, size and form. Uniformity refers to exact resemblance in color, size and form of the specimen making up a plate or exhibit. The exhibit must be a uniform lot or unit in appearance - not merely a collection of good individual specimens.
